

Session III

Hands-on Session

Thomas J. Leeper

Government Department
London School of Economics and Political Science

Share your TESS Examples

In groups of 4–5, share your TESS examples

- What was the researcher's question?
- How did they test it experimentally?
- What was interesting or surprising about the designs?

Take about 7–8 minutes.

Groupwork

In the same group, develop a survey experiment

- What's your research question?
- What is/are your hypotheses?
- What's the outcome? How will you measure it?
- How will you operationalize your causal variable?
- Also think about: sampling, etc.

Presentations 14:45–15:45

Presentations

Discussion

- What was enjoyable about this exercise?
- What was challenging about it?
- What do you still want to know?
